CAREER OBJECTIVE

Full-stack web developer seeking a Full-Stack / MERN Developer role to design and build secure, scalable web applications. Hands-on experience with the MERN stack and Next.js building authentication systems, REST APIs, and booking platforms, with a strong focus on clean architecture and user-focused design. Looking to contribute to a professional engineering team while continuing to grow as a developer.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router), TypeScript, Tailwind CSS
Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
UI Libraries: Shadcn/UI, HeroUI, DaisyUI
Backend: Node.js, Express.js, REST APIs
Database: MongoDB, Mongoose, MongoDB Atlas
Auth & Security: BetterAuth, Firebase Auth, JWT, jose
Tools: Git, GitHub, Vercel, Figma
Soft Skills: Problem Solving, Communication, Team Collaboration

PROJECTS

RecipeHub — Recipe Sharing Platform Live Demo | GitHub Client | GitHub Server
Next.js · Express.js · MongoDB · BetterAuth · Stripe

- Built a full-stack recipe sharing platform with recipe creation, browsing, filtering, and user management features.
- Implemented secure role-based access control with BetterAuth, supporting both email/password and Google OAuth login.
- Integrated Stripe premium membership, enforcing recipe-creation limits for free users and unlocking unlimited access for premium subscribers.
- Deployed on Vercel with environment-based configuration across authentication, database, and payment services.

MediQueue — Tutor Booking Platform Live Demo | GitHub Client | GitHub Server
Next.js · Express.js · MongoDB · BetterAuth · JWT

- Built a complete tutor management workflow with protected CRUD operations and end-to-end booking management.
- Designed a time-slot booking system that validates availability in real time to prevent double bookings and scheduling conflicts.
- Secured all protected routes with JWT-based authentication via BetterAuth and custom middleware.
- Implemented a dynamic dark/light theme toggle with consistent styling across all pages.

QurbaniHat — Livestock Booking Platform Live Demo | GitHub Client
Next.js · BetterAuth · MongoDB Atlas

- Built a full-stack marketplace for listing and booking livestock with a complete authentication flow.
- Integrated Google OAuth via BetterAuth with proper callback configuration and error handling.
- Deployed to Vercel with environment variable management and a CI/CD pipeline for continuous delivery.
- Implemented form validation and a fully responsive UI across mobile and desktop breakpoints.

EDUCATION

Diploma in Engineering (Computer Science and Technology) 2023 – Present (Expected 2026)
Thakurgaon Polytechnic Institute, Bangladesh
Coursework: OOP (Java, Python), Data Structures & Algorithms, Operating Systems, Data Communication

Secondary School Certificate (SSC) Passed: 2022
Thakurgaon Technical School and College, Bangladesh
Trade: Computer & Information Technology

CERTIFICATIONS

Complete Web Development Course — Programming Hero
Certificate: View Certificate

LANGUAGES

Bengali — Native **English** — Conversational
